Willing to relocate: Anywhere

Work Experience

Senior software developer
PITS ltd (IMH ltd) - https://www.metholding.ru/
August 2017 to Present

Development and maintaining business intelligence system based on Oracle BI

- Creating DWH, repositories, dashboards, analysis.
- Improving company productivity by automation most of the business processes, almost eliminated process involving manually collecting and transporting data from multiple sources to the one system by implementing different features like ETL or web-forms
- Reducing decision-making time due to convenience and visual presentation of data (including by customizing the visual display of data using JavaScript and particularly JQuery to build own chart system, creating and filtering data arrays, implementing everyday reports via emails by using BIPublsher and custom Agents). By improving the ui / ux design, we have minimized the access time to critical data.
- Today, the top management of the company can access critical data due to an ecosystem of business tools (mobile, desktop and web application) that extremely expands the ability to access data from anywhere in the world

WEB developer
SO.USE - https://so-use.ru/
May 2016 to 2017

Website development from scratch and re-design of existing websites, UX / UI design development, creation of an individual website design. Developing websites with best practice of html/css/js. Working with modx, joomla and similar cms.

- Develop and maintaining back-end systems based on php/mysql/nodeJs
- Creating front-end to SPAs, Landing pages, internet shops (based on MODx and Bitrix)
- Build front-end for content managers (adding forms, lists and etc.)
- Also, for all websites, creating brand new designs for websites, business cards, banners and even for package

Provides our clients the best service for creating and promoting websites that perfectly presents their companies
